Only a word may make considerable difference in filling your order for valves. If you want genuine Jenkins valves, say JENKINS BROS. to your dealer, and say it with emphasis. Then look at your valves and see if they bear this trade mark . . . .

It is the guarantee of the originators of renewable disc valves. It ensures to the user a high standard of quality and workmanship, and protects him against the endless annoyances which are the result of using imitations and substitutes.

It's just as easy to get the genuine and  
so much easier after you have them.

# New WESTON Instruments

A full line of Alternating Current  
Switchboard Indicating Instruments

is offered by this company, comprising

WATTMETERS, Single and Polyphase FREQUENCY METERS  
POWER FACTOR METERS AMMETERS  
SYNCHROSCOPES VOLTMETERS  
and New Models of Weston D. C. Instruments to match

**T**HIS WORKS GROUP OF INSTRUMENTS, including the results  
of several years' exhaustive study and scientific investigation  
of all the complex electrical and mechanical problems involved  
in the development of accurate, reliable, sensitive and durable  
instruments for use on alternating current circuits.

Every detail of each of these instruments has been most carefully studied and worked out so as to be sure that each shall fully meet the requirements of the service for which it is intended. Particular note for constant has been given to the effort to produce instruments having the highest possible life, the best possible scale characteristics, combined with great reliability under the most violent kind of handling, and also under the many other trying conditions met with in practical work. Every part of each instrument is made strictly to design and the design and workmanship and finish is of the highest order of excellence.

We make the most careful examination of every detail of each member of the group. We also submit the fullest investigation of the many other novel features and very valuable operating characteristics of these new instruments, and suggest a careful comparison, in all these respects with any other make of instruments intended for like service. We offer them as a valuable and permanent contribution to the art of electrical measurement. Their performance in service will be found to justify the claim that no other make of instruments approaches them in accuracy for the service required from A. C. switchboard indicating instruments.

Full particulars of design, construction, prices, etc.,  
are given in Catalogue P. S. 14. Write for it

## "Supper Ready"

When you get back to camp, tired and hungry, you do not want to spend the rest of the evening getting supper ready. You want a stove you can start up in a minute—that will cook quick and well.

For camp, houseboat or bungalow, a New Perfection Oil Cook-stove is the ideal cooking device. It is ready for use in a moment. It saves all the trouble of cutting wood and getting in coal. It does not overheat or make dirt in a kitchen; there are no ashes nor smoke. It requires less attention and cooks better than any other range.

Made with 1, 2 and 3 burners, with long, turquoise-blue enameled chimneys. Handsomely finished throughout. The 2- and 3-burner stoves can be had with or without a cabinet top, which is fitted with drop shelves, towel racks, etc.
